Dennis Purdy

347 N. Highway 5

Camdenton, MO 65020

Dear Comfort Care Heating & Cooling, Inc.,

I had two KVAR Panel Mount Energy Controllers installed at my restaurant in the Spring of 2008. After comparing my electric bills from 2007 to 2008, the units have demonstrated the ability to reduce my electrical consumption. The savings began immediately after installation and have averaged 18% a month on my total electric bill. Over a 4 month period, those savings have averaged \$428.00 from the same months last year.

In the current economic climate and increasing energy costs, the KVAR Energy Controller has made a measurable difference in my overhead expense. I am pleased with my decision to install the KVAR Energy Controllers and would recommend any business that is serious about energy savings, to consider installing the KVAR Energy Controller.

Sincerely,

A handwritten signature in black ink, appearing to read "Dennis Purdy", written over a white background.
